Installation Specifications
At www.CORONADO.com product specifications can be downloaded in CSI format.

Choices Specific to Creek Rock

Standard Colors: Apache Brown, Calico Sand, Palm Springs Blend, Southwest Blend or Any Custom Color
Grout Joint Width: Standard ½” Grout Joint or Drystacked (with some fill-in grout)
Grouting Options: Deep Raked or Drystacked
Grout Joint Color: Natural Grey, Natural Off-White, White or Complementary Color
Accessories: Corners, Complementary Tiles, Wall Caps, Post Caps and more. (See Accessories section of binder)

Special Installation Notes

Pattern: Blend the stone on the wall from several different boxes to ensure proper color and size variation.
Grout Joints: When stacking Creek Rock, lay stones in a near-level position (10°-15° off-level maximum). Grouting may be necessary.
Sealing: Not required. However, if installed on an exterior exposed to excessive water from runoff or improper drainage, we suggest the product be sealed in that particular area to protect it from staining or spalling during freeze-thaw cycles.
Grout Joint Color: When installing stone in a freeze-thaw environment, extra care should be taken to ensure a full coverage of mortar on the back of each stone, which will prevent water pooling behind the stone after it’s been installed.
Drystacked: A polymer modified mortar should be used for all drystacked applications.

Profile Properties

Size: Standard: 3” to 10” (nominal) Skippers: 1” to 2” in height and up to 6” in length (nominal).
Thickness: Varies from ¾” (edges) up to 2½” (center section). Note: Use 1¼” dimension for setting light fixtures.
Weight: 7 to 10 lbs. per square foot.
Packaging: Available in big boxes (100 sq ft Flats & 100 lft Corners) or Dura-Paks (12.5 sq ft Flats & 12.5 lft Corners).

When purchasing Creek Rock, coverage is based on installation with a ½” joint at the back of the stone.
